

## Why not spring clean your old company pension schemes today?

Pensions are a constantly evolving market and by reviewing your old retirement fund you can evaluate if you have the best offer working for you.

At CWM Wealth Management we can offer you our financial intelligence to ensure that your retirement fund proves to be value for money and has the ability to access some of the top-performing investment managers.

If you currently have a retirement fund to which you no longer contribute, then now is the time to speak to CWM Management. We have negotiated access to a structure, eligible to these types of retirement funds, which may prove to be a very beneficial proposition.

Our Financial Advisory Service is free to you as a CXC Contractor and we also offer a 100% allocation rate and Annual Management Fees as little as 1% per annum.

When we assess your retirement fund from previous employment, we can investigate the possibility of an immediate uplift on your investment.

**For Example: After 12 months of investment, as at 31st January this year, your €75,000 retirement fund could have become €97,350! Although past performance is not an indicator of future performance, we can now give you access to top quartile Funds who are generating consistent returns\*.**

\*confirmed by an independent managed fund survey Jan 2010

Revive your old pension plans by contacting Carol Brick, Managing Director regarding above as soon as possible.
